

## KZ Connect C313RL

With unloaded vehicle weights from 5,790 to 7,805 pounds, and lengths from 28 feet, 5 inches to 37 feet, 9 inches, the Connect line of travel trailers offers something for almost everyone. But that didn't stop designers from going back to the drawing board, as the \$44,000 (base MSRP) C313RL becomes the 14th model in the lineup.

An inch shy of 37 feet and with a uvw of 7,760 pounds, the three-slide C313RL is a rear-living trailer that, like the rest of the Connect models, offers a king bed in a streetside slideout up front.

Oposing slides in the rear living area create an open space, including an island kitchen and dual recliners facing an angled entertainment center with an optional fireplace.

"Tied into that, we've put in the new two-piece Furrion oven that's part of the Chef Collection," said KZ General Manager Brent Froman. "This is a feature that's usually put in higher-end fifth-wheels that we've brought into the laminated travel trailer market."
